

Website Development Plan

Website development is a way to make people aware of the services and/or products you are offering, understand why your products are relevant and even necessary for them to buy or **use**, and see which of your company's qualities set it apart from competitors.

A **website** should exist primarily as a means for growth.

It should leverage the business by serving as a tool to meet big picture business **goals**. For years, the **purpose** of a **website** has been to tell people about your business.

Our Solution

We'll help you to present your business online through a responsive website. The site will be clean and appealing. And we'll make sure the site looks and works great on mobile devices and desktop, tablet platforms as well. Creating a home page and other informative pages accordingly will help others to understand more about you.

The site will be search engine optimized and designed with page load speeds to provide an enjoyable user experience. We believe the site should be simple yet visually appealing with type that is easy to read, uncluttered pages and dynamic use of imagery, video and other devices. The home page will highlight blogs and social media posts to engage the public.

www.adwebcreations.com

The new design will have five main landing pages:

- Home Page
- About
- Services
- Gallery
- Contact

On each of these pages, we will include a left-hand column that Sample Company can use to create links to as many "subpages" as they wish. Therefore, the CMS allows for as many pages as necessary, without incurring additional cost beyond the original design and landing pages fee.

What we need from you:

- Content (If possible)
- Images if You Have
- Contact Details / Email Address.
- Google My Business Details
- Domain
- Hosting & SSL

Project Completion Time : 7 to 10
Days (Approx.)

About Us

Who we are

- Adweb Creations, one of the best digital marketing, graphics and web development service providers at your nearest location & working countrywide in India.
